

On-the-Go Collaboration

a³™ CeramicSteel Mobile

Capture Ideas Anywhere

PolyVision a³ CeramicSteel Mobile enables on-the-go collaboration. This two-sided mobile whiteboard features casters that lock and unlock so it can roll smoothly across the floor. Line up multiple boards side by side for large brainstorming sessions, separate them for smaller breakout sessions, or simply move collaboration from one room to another. When not in use, Mobile nests easily to save on space.

Productivity Meets Durability

Made with PolyVision a³ CeramicSteel, Mobile features a smooth glass-like surface that is magnetic and easy to clean. Resistant to scratches, stains, fire and bacteria, CeramicSteel offers lasting durability for more than 50 years.

The Arctic White CeramicSteel surface delivers crisp marker-to-whiteboard color contrast with no shadowing effects, provides readability not found with other surfaces.

The aluminum frame is powder coated in select neutral colors to blend seamlessly into any space.

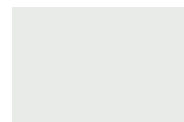

With Mobile, productivity can happen anywhere.
